REVIEW OF THE ANNUAL REPORT OF THE ANIMAL HUSBANDRY DEPARTMENT, WEST PUNJAB, FOR THE YEAR 1947-48.

The 9th January 1950

No. 66-D(A)—The report is the first since the creation of Pakistan and the consequent partition of the Punjab. Four and a half months come within the pre-partition period, but practically the report deals with the activities of the Department for the period of the year after partition only. In spite of the set back suffered by it on account of the major portion of its staff having gone over to East Punjab, all five branches of the Department were kept in working order; they are—

(1) Livestock breeding;

(2) Treatment and control of diseases among livestock;

(3) Veterinary education and research;

(4) Dairying; and

(5) Poultry.

The first problem which required attention after partition was the care of the cattle brought in by refugees. Due to long journeys and lack of feeding, these cattle reached West Punjab in extremely poor condition and in order to protect them against Rinderpest, the Department vaccinated no less than 2, 12, 849 animals with Goat Tissue Virus Vaccine.

Of the several veterinary subordinates previously in the service of District Boards in East Punjab districts, 39 compounders were provided for by District Boards in West Punjab through the efforts of the Department and eleven Refugees Stock Assistants were absorbed in the Department itself.

Livestock Breeding—It suffered a serious set back owing to the loss of the Government Livestock Farm at Hissar. However, in spite of having agreed to make over to us our share of the cattle from that farm, the East Punjab Government has so far failed to implement this agreement. The department has therefore been deprived for the time being of its share of pedigree cattle which had been built up on the finances of the undivided Punjab.

Breeding was, however, carried on in the Grantee Cattle Farms in the Montgomery and Multan districts, Cattle breeding in the Dhanni, Sahiwal and Dajjal tracts received special attention during the year and successful progress has been made. Camel breeding in the Dera Ghazi Khan and Muzaffargarh districts, sheep breeding in the Jhelum district and goat breeding in the Gujrat, Gujranwala and Sialkot districts were encouraged by the distribution of prizes and by the grant of subsidies to interested breeders.

The department has a network of 191 Veterinary hospitals and 79 outlying dispensaries, in addition to which there are 760 temporary outlying dispensaries which are visited periodically by the Veterinary Assistants or Veterinary Assistant Surgeons in charge of the nearest hospitals. By this arrangement the department is able to provide veterinary aid even in the remotest corners of the Province. During the year under report 853,776 patients were treated in the hospitals and 39,655 cases were supplied with medicens without being brought to the hospitals. The district staff, while on tour, visited 24, 158 villages during the year under report. Prior to partition all Sera and Vaccines (except Goat Tissue Virus Vaccine) were obtained from the Indian Veterinary Research Institute but this source of supply was completely cut off to West Punjab after partition. The manufacture of Biological Products was, therefore, taken up at the West Punjab Veterinary College and it is hoped that the Province will be self-sufficient in such products in the near future.

The West Punjab Veterinary College maintained a high standard of teaching and research in spite of the difficulties experienced on account of partition. In spite of the fact that the date of admission was extended up to the 31st December 1947, only 39 applications were received and all were admitted. The results of the examinations held after partition are satisfactory. The hospital attached to the College is doing very useful work for local animals. The research work done since partition on biological productions anti-rabic treatment, control of liverfluke infestation and the treatment of lungworms in sheep and goats, is progressing steadily in spite of the fact that the non-Muslim Officer-in-Charge had left and the work had to be taken up almost afresh by a new officer.

Although little expension has been possible, the report of the Animal Husbandry Department for the year ending March 1948, is a record of steady progress in the control of diseases, the improvement of livestock and veterinary education and research. The total number of cattle fairs and shows held during the year under report was 107. One day cattle shows are now an important feature of district work, and in them the best livestock is collected, prizes are distributed, demonstrations and instructions are given and the value and the means of improving livestock are fully explained and appreciated. This forms a very healthy and effective mode of propaganda.

Dairying and Poultry farming remained rather neglected but attention is now being given to these also and it is hoped that good results will be achieved in the near future.

Great credit is due to MR. S.M.A. Shah and his staff for the patient and steady manner in which they have performed their duties in the very trying conditions under which they worked during this momentous year.

By order of the West Punjab Government
